

A photograph of three people sitting at a table under a solar panel canopy. The canopy is made of dark solar panels mounted on a metal frame. The people are sitting on metal benches at a perforated metal table. On the table are laptops, a blue water bottle, and some papers. The background shows a clear blue sky, some trees, and a building in the distance. The overall scene is bright and sunny.

LUMOS

Welcome
to the
SolarZone

What is the **SolarZone**?

The **SolarZone** is a stand alone solar shade and charging structure.

Imagine a comfortable, shaded oasis where you can relax while charging your mobile devices and laptops.

Each **SolarZone** includes (4) wireless chargers and (4) outlets for mobile device and laptop charging. With our LSX Modules, you have unlimited charging ability when the sun is shining. When the sun goes down, the **SolarZone** has enough battery storage for 8 hours of laptop charging, 4 hours of wireless mobile device charging and can keep the lights on for over 8 hours.

The integrated LED lighting makes the **SolarZone** a great place to hang out into the evening. The lights can be programmed to turn on and off automatically based on whatever schedule you like.

The **SolarZone** makes using solar energy accessible in a functional and aesthetic package that will be appreciated by everyone.

The **SolarZone** and all of our proprietary products are built from the highest quality components and state-of-the-art US manufacturing to create the most beautiful, durable and functional solar products available.

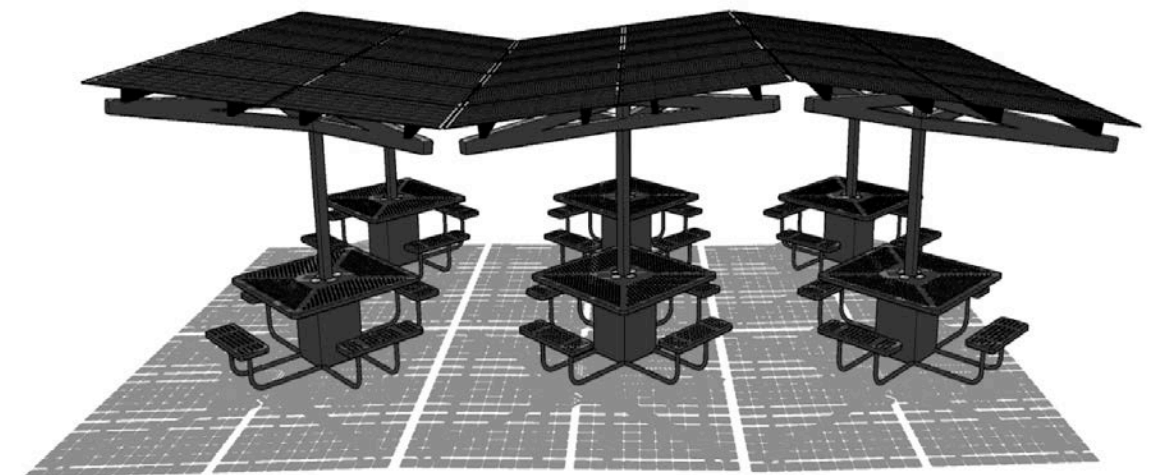

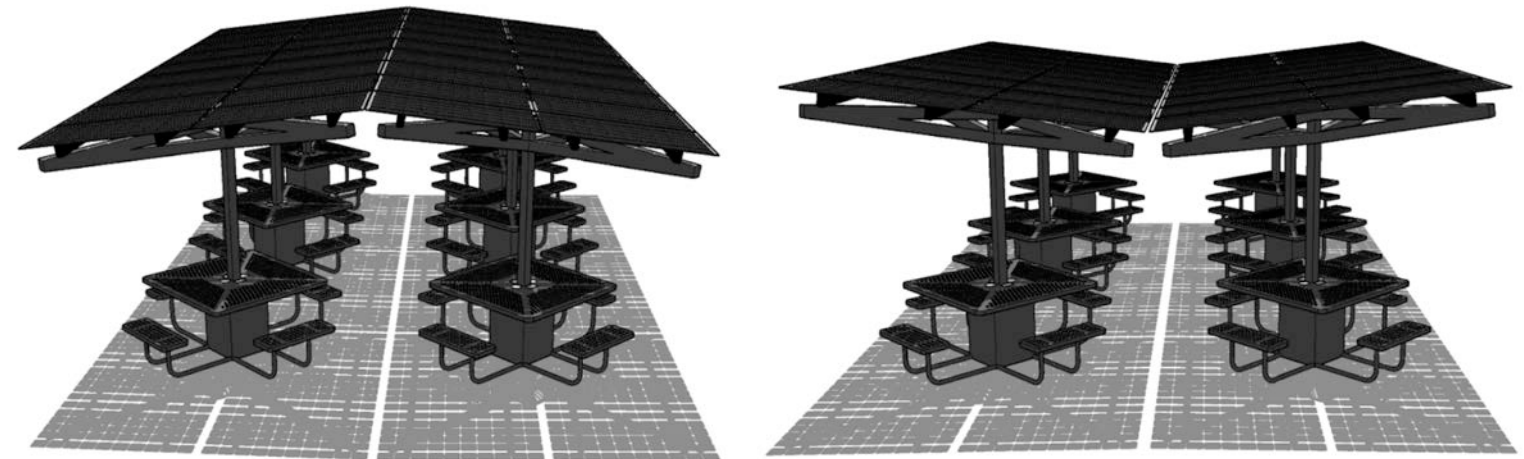

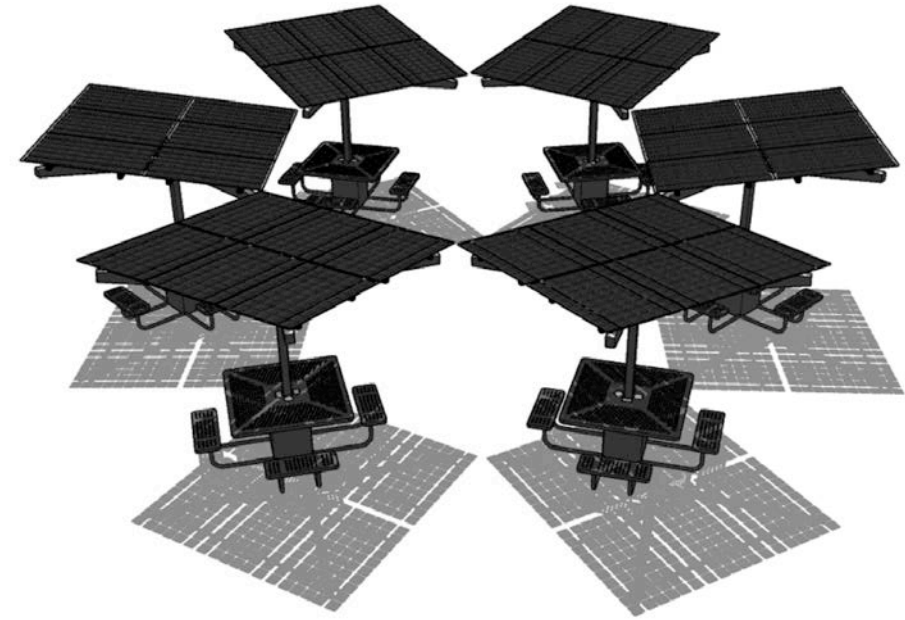

How to use a SolarZone?

The **SolarZone** is perfect to create a shaded seating area for campuses, cafes, golf courses, soccer fields, stadiums, restaurants, food trucks, pool side, resorts, anywhere a shaded seating area and charging would be appreciated.

How about creating an outdoor classroom by combining multiple **SolarZones**? A seating area for a brewery or food trucks? Picnic area to watch kids soccer games? Outdoor seating for your favorite cafe or restaurant?

The possibilities are endless...
